

Assets Document

Online Gaming Website (Rockstar Games Clone)

Reference Website: <https://www.rockstargames.com>

Category: Web Development

Date: June 2026

This document catalogues all visual, media, audio, font, and icon assets required to build the Online Gaming Website. Each asset is listed with its type, format, dimensions or specifications, and the page or component where it is used.

1. Image Assets

1.1 Branding & Logos

ID	Asset Name	Format	Dimensions / Notes
IMG-001	Studio Logo (Primary)	SVG + PNG	Vector; PNG fallback at 400x120px
IMG-002	Studio Logo (White)	SVG + PNG	White variant for dark backgrounds
IMG-003	Studio Logo (Icon Only)	SVG + PNG	Square icon 64x64px for favicon
IMG-004	Favicon	ICO + PNG	16x16, 32x32, 180x180px
IMG-005	Open Graph Default Image	PNG / JPG	1200x630px, used when no page-specific OG

1.2 Homepage Hero Carousel

ID	Asset Name	Format	Dimensions / Notes
IMG-006	Hero Slide 1 - Featured Game Key Art	JPG / WebP	1920x1080px, main promotional title
IMG-007	Hero Slide 2 - Upcoming Release Art	JPG / WebP	1920x1080px
IMG-008	Hero Slide 3 - Online Mode Promo	JPG / WebP	1920x1080px
IMG-009	Hero Slide 4 - Season Event Art	JPG / WebP	1920x1080px
IMG-010	Hero Slide 5 - Legacy Title Art	JPG / WebP	1920x1080px
IMG-011	Hero Slide Game Logo Overlays (x5)	PNG	Transparent, max 600x200px each
IMG-012	Mobile Hero Slides (x5)	JPG / WebP	750x1200px, cropped for portrait

1.3 Game Library Assets

ID	Asset Name	Format	Dimensions / Notes
IMG-013	Game Cover Art Thumbnails (per title)	JPG / WebP	600x800px (3:4 ratio), min 10 titles
IMG-014	Game Detail Hero Banners (per title)	JPG / WebP	1920x800px, with dark gradient overlay
IMG-015	Game Logo Images (per title)	PNG	Transparent, max 500x180px each
IMG-016	In-Game Screenshots (6-12 per title)	JPG / WebP	1920x1080px, lightbox gallery assets
IMG-017	Platform Badges (PC, PS5, Xbox, Switch)	SVG / PNG	24x24px icons
IMG-018	Feature Icons (Open World, Multiplayer)	SVG	32x32px, outline style

1.4 Newswire / Blog Assets

ID	Asset Name	Format	Dimensions / Notes
IMG-019	Article Thumbnail Images (per article)	JPG / WebP	800x450px (16:9), min 10 articles
IMG-020	Article Hero Banner Images	JPG / WebP	1400x600px, full-width article headers
IMG-021	Category Badge Icons (Updates, Events)	SVG	20x20px, 5 categories
IMG-022	Author Avatar Placeholders	PNG / JPG	80x80px, circular crop
IMG-023	Article Body Inline Images	JPG / WebP	Up to 1200px wide, variable height

1.5 Store / E-Commerce Assets

ID	Asset Name	Format	Dimensions / Notes
IMG-024	Product Images - Games (per product)	JPG / WebP	800x1067px (3:4), min 5 products
IMG-025	Product Images - Apparel (per product)	JPG / WebP	800x800px (1:1), 4-6 views each
IMG-026	Product Images - Collectibles	JPG / WebP	800x800px (1:1), 4-6 views each
IMG-027	Sale Badge Graphic	SVG / PNG	Overlay badge, approx 80x40px
IMG-028	Empty Cart Illustration	SVG / PNG	300x300px, stylised illustration
IMG-029	Order Confirmation Illustration	SVG / PNG	250x250px, success graphic

1.6 User Account Assets

ID	Asset Name	Format	Dimensions / Notes
IMG-030	Default User Avatar	PNG	200x200px, circular, neutral silhouette
IMG-031	Achievement Badge Icons (sample set)	SVG / PNG	48x48px, min 10 sample icons
IMG-032	Profile Background / Banner	JPG / WebP	1200x300px, decorative header

1.7 Support Portal Assets

ID	Asset Name	Format	Dimensions / Notes
IMG-033	Support Category Icons (x6)	SVG	40x40px, outlined style
IMG-034	Status Indicator Icons (Operational, De	SVG	16x16px, green/yellow/red
IMG-035	Empty Search Results Illustration	SVG / PNG	250x200px

1.8 Miscellaneous Page Assets

ID	Asset Name	Format	Dimensions / Notes
IMG-036	About Page Team Member Photos (x6)	JPG / WebP	300x300px, circular crop
IMG-037	Studio Office Location Map Image	JPG / PNG	800x400px or Google Maps embed
IMG-038	Downloads Page Launcher Icons	SVG / PNG	64x64px per platform
IMG-039	Wallpaper Gallery Images (x10)	JPG	3840x2160px (4K), organized by game
IMG-040	Age Rating Badges (ESRB, PEGI)	SVG / PNG	60x80px each
IMG-041	Social Media Icons (x5)	SVG	24x24px, Twitter/X, Instagram, YouTube, Fac
IMG-042	404 Error Page Illustration	SVG / PNG	400x300px

2. Video Assets

2.1 Homepage Videos

ID	Asset Name	Format	Dimensions / Notes
VID-001	Hero Carousel Background Videos (x2)	MP4 / WebM	1920x1080px, 15-30s loops, muted autoplay
VID-002	Flagship Game Promo Video #1	MP4 / WebM	1920x1080px, 30-60s, muted autoplay w/ par
VID-003	Flagship Game Promo Video #2	MP4 / WebM	1920x1080px, 30-60s, muted autoplay w/ par

2.2 Game Trailers & Gameplay

ID	Asset Name	Format	Dimensions / Notes
VID-004	Official Trailers (1 per game title)	YouTube Embed	16:9, min 10 trailer URLs
VID-005	Gameplay Videos (select titles)	YouTube Embed	16:9, 3-5 gameplay videos
VID-006	Behind the Scenes Videos	YouTube Embed	16:9, 2-3 BTS videos

2.3 Video Thumbnails

ID	Asset Name	Format	Dimensions / Notes
VID-007	Video Thumbnail Images (per video)	JPG / WebP	640x360px, with play button overlay

3. Font / Typography Assets

All fonts are loaded via Google Fonts CDN. No self-hosted font files are required unless the project opts for local hosting for performance.

ID	Font Family	Weights	Usage
FNT-001	Roboto Condensed	600, 700	Headings (h1, h2, h3)
FNT-002	Inter	400, 500, 600	Body text, buttons, navigation, captions

Source: <https://fonts.google.com>

License: Open Font License (OFL) - free for commercial and personal use.

Subsetting: Latin character set only to minimize download size.

4. Icon Assets

Icons should be sourced from a consistent icon library. Recommended: Lucide Icons (open source, MIT license) or Heroicons. All icons must be SVG format for scalability.

4.1 Navigation & UI Icons

ID	Icon Name	Size	Usage
ICN-001	Search (Magnifying Glass)	24x24px	Navbar search trigger

ID	Icon Name	Size	Usage
ICN-002	User (Person Silhouette)	24x24px	Navbar account menu
ICN-003	Hamburger Menu (3 Lines)	24x24px	Mobile menu toggle
ICN-004	Close (X)	24x24px	Modal close, menu close, overlay close
ICN-005	Shopping Cart	24x24px	Navbar cart link with badge
ICN-006	Chevron Left / Right	20x20px	Carousel navigation, pagination
ICN-007	Arrow Left (Back)	20x20px	Back navigation
ICN-008	External Link	16x16px	Links opening in new tab
ICN-009	Filter / Funnel	20x20px	Filter controls
ICN-010	Sort (Arrows Up/Down)	20x20px	Sort controls

4.2 Action & Status Icons

ID	Icon Name	Size	Usage
ICN-011	Play (Triangle)	48x48px	Video play overlay on thumbnails
ICN-012	Share	20x20px	Social sharing buttons
ICN-013	Copy / Clipboard	20x20px	Copy link button
ICN-014	Heart / Wishlist	20x20px	Add to wishlist button
ICN-015	Trash / Delete	20x20px	Remove cart item, delete account
ICN-016	Edit / Pencil	20x20px	Edit profile, edit settings
ICN-017	Upload	20x20px	Avatar upload, file attachment
ICN-018	Check Circle (Success)	24x24px	Success states, verified status
ICN-019	Alert Triangle (Warning)	24x24px	Warning states
ICN-020	X Circle (Error)	24x24px	Error states, failed actions
ICN-021	Info Circle	24x24px	Informational tooltips
ICN-022	Eye / Eye Off	20x20px	Password visibility toggle

4.3 Social Media Icons

ID	Icon Name	Size	Usage
ICN-023	Twitter / X	24x24px	Footer, sharing buttons
ICN-024	Instagram	24x24px	Footer
ICN-025	YouTube	24x24px	Footer
ICN-026	Facebook	24x24px	Footer, sharing buttons
ICN-027	TikTok	24x24px	Footer
ICN-028	Reddit	24x24px	Article sharing buttons

5. Colour Palette Assets

The following colour tokens define the project's visual identity. All values must be implemented as CSS Custom Properties in globals.css.

5.1 Core Palette

ID	Token Name	Hex Value	Usage
CLR-001	--color-bg-primary	#000000	Page backgrounds
CLR-002	--color-bg-secondary	#0A0A0A	Card / section backgrounds
CLR-003	--color-bg-tertiary	#141414	Input fields, elevated surfaces
CLR-004	--color-bg-hover	#1A1A1A	Hover states on surfaces
CLR-005	--color-text-primary	#FFFFFF	Headings, primary text
CLR-006	--color-text-secondary	#B3B3B3	Body text, descriptions
CLR-007	--color-text-muted	#666666	Metadata, timestamps
CLR-008	--color-accent-primary	#FCAF17	Primary buttons, brand accent
CLR-009	--color-accent-hover	#E09A00	Primary button hover
CLR-010	--color-accent-secondary	#D85A30	Secondary accent, sale badges
CLR-011	--color-border	#222222	Default borders
CLR-012	--color-border-hover	#333333	Border hover state

5.2 Semantic Colours

ID	Token Name	Hex Value	Usage
CLR-013	--color-success	#2ECC71	Success states, operational status
CLR-014	--color-warning	#F39C12	Warning states, degraded status
CLR-015	--color-error	#E74C3C	Error states, outage status

6. Animation & Motion Specifications

All animations are CSS-based. No external animation libraries are required. The following specifications define the motion language of the website.

ID	Animation	Duration	Easing / Notes
ANI-001	Button hover transition	200ms	ease-out; scale, background-color, box-shadow
ANI-002	Card hover lift effect	200ms	ease-out; translateY(-4px) + shadow elevation
ANI-003	Game card image scale	300ms	ease-out; scale(1.05) on hover
ANI-004	Hero carousel crossfade	800ms	ease-in-out; opacity transition between slides
ANI-005	Modal open (fade + scale)	300ms	ease-out; opacity 0>1, scale 0.95>1
ANI-006	Modal close	200ms	ease-in; reverse of open

ID	Animation	Duration	Easing / Notes
ANI-007	Accordion expand/collapse	300ms	ease-out; max-height transition
ANI-008	Toast notification enter	500ms	ease-out; slide in from top-right
ANI-009	Toast notification exit	300ms	ease-in; slide out + fade
ANI-010	Skeleton loader pulse	1500ms	ease-in-out; infinite opacity pulse
ANI-011	Page content fade-in	400ms	ease-in-out; opacity 0>1 on route change
ANI-012	Mobile menu slide-in	300ms	ease-out; translateX from -100% to 0
ANI-013	Search bar expand	250ms	ease-out; width 0 to full
ANI-014	Add-to-cart flyout	600ms	ease-in-out; thumbnail flies toward cart icon
ANI-015	Image lightbox zoom-in	300ms	ease-out; scale 0.9>1 + fade

7. Data / Seed Content Assets

The following JSON seed data files must be created to populate the website with realistic sample content during development.

ID	File Name	Format	Content Description
DAT-001	games.json	JSON	Min 10 game entries: title, slug, description, featured
DAT-002	articles.json	JSON	Min 10 news articles: title, slug, category, author
DAT-003	products.json	JSON	Min 15 products: name, category, price, sale price
DAT-004	faq.json	JSON	Min 15 Q&A pairs grouped by topic: Account, Billing, Gameplay
DAT-005	support-articles.json	JSON	Min 10 help articles: title, slug, category, body
DAT-006	videos.json	JSON	Min 10 video entries: title, game, type, YouTube ID

8. Third-Party & External Service Assets

The following external services and API keys are required. All must be configured via environment variables (.env.local).

ID	Service	Asset / Key Required	Notes
EXT-001	MongoDB Atlas	Connection string (MONGODB_URI)	Free tier cluster; database name: gaming-web
EXT-002	Stripe	Publishable + Secret key (test mode)	STRIPE_PUBLIC_KEY, STRIPE_SECRET_KEY
EXT-003	NextAuth.js	NEXTAUTH_SECRET, NEXTAUTH_URL	Random 32-char secret; URL = deployment domain
EXT-004	Nodemailer / Resend	SMTP credentials or API key	For verification & password reset emails
EXT-005	Google Fonts CDN	No key required	Roboto Condensed + Inter via <link> or next/font
EXT-006	YouTube IFrame API	No key required	Embedded player for trailers and gameplay
EXT-007	Google Maps Embed	Google Maps API key (optional)	For About page studio locations map

9. Asset Summary

Total Asset Count by Category

Category	Count	Primary Formats
Image Assets (IMG)	42 items	SVG, PNG, JPG, WebP
Video Assets (VID)	7 items	MP4, WebM, YouTube Embed
Font Assets (FNT)	2 families	Google Fonts (WOFF2)
Icon Assets (ICN)	28 items	SVG
Colour Tokens (CLR)	15 tokens	CSS Custom Properties
Animation Specs (ANI)	15 specs	CSS Transitions / Keyframes
Data / Seed Files (DAT)	6 files	JSON
External Services (EXT)	7 services	API Keys / URLs

Asset Delivery Notes

1. All image assets must be optimised for web delivery. Use WebP as the primary format with JPG/PNG fallbacks where necessary.
2. SVG assets must be cleaned (no embedded raster data, no unnecessary metadata) and minified for production use.
3. Video assets for autoplay backgrounds must be compressed to under 5MB per clip to ensure fast page load times.
4. All seed data JSON files must contain realistic, complete entries - not placeholder text like 'Lorem ipsum'. Game descriptions, article bodies, and product details should read as authentic content.
5. Icons should be sourced from a single, consistent icon library (recommended: Lucide Icons, MIT license) to maintain visual coherence.
6. Colour tokens must be implemented as CSS Custom Properties in globals.css and used consistently across all components. No hard-coded colour values in component styles.
7. Google Fonts should be loaded using next/font/google for automatic optimisation and self-hosting in production builds.
8. All third-party API keys must be stored in .env.local (not committed to version control) with placeholder values documented in .env.example.
